## EDUCATION

|                                   |             |
|-----------------------------------|-------------|
| Diploma in Fitter                 | 2021 - 2023 |
| Bachelor of Arts, CSJM University | 2018 - 2021 |

## SKILLS

|                          |   |
|--------------------------|---|
| Languages and Databases  | HTML, CSS, Tailwind CSS, JavaScript, MongoDB              |
| Frameworks and Libraries | React.js, Express.js                                      |
| Tools                    | Git, Github, ChatGPT, Netlify, Vercel                     |
| Other Skills             | Testing, API Integration, Cloud Services, Version Control |

## EXPERIENCE

|                    |                        |
|--------------------|------------------------|
| Frontend Developer | Feb 2022 - Jul 2024    |
| 30 Days Coding     | Hardoi (Uttar Pradesh) |

- Designed and developed web applications leveraging HTML, CSS, JavaScript, and React.js to create dynamic and interactive user interfaces.
- Employed Tailwind CSS to ensure responsive and visually appealing design across various devices, and utilized Git and GitHub for efficient version control and collaborative development.
- Focused on optimizing application performance and maintaining cross-browser compatibility to deliver a seamless user experience.

## PROJECTS

### ECHO VERSE Blog Application. ([Try it here](#))

- Developed a full-stack blog application with secure user authentication, blog management, and responsive design.
- Utilized React and TailwindCSS for the frontend, with a Node.js/Express backend and MongoDB for data handling.
- Added features like automated newsletters and Cloudinary image management for enhanced functionality.

### Hospital Management System. ([Try it here](#)) ([Try it here](#))

- Created a comprehensive hospital management system for ZeeCare Medical Institute, featuring secure patient management, appointment scheduling, and an admin dashboard for overseeing doctors and appointments.
- Built with React for the frontend, Node.js for the backend, and MongoDB for data storage, incorporating JWT-based authentication for secure access.
- Integrated Cloudinary for efficient image management and enhanced system functionality.

### Real-Time Dashboard. ([Try it here](#))

- Created a Real-Time Dashboard with Syncfusion components, React, and TailwindCSS for interactive data visualization.
- Enabled real-time updates and intuitive interactions with features like scheduling, kanban boards, and rich text editing.
- Enhanced data management with a responsive and user-friendly design.

## AWARDS AND ACHIEVEMENTS

- Career Essentials in Generative AI by Microsoft and LinkedIn. ([Show credential](#))
- What Is Generative AI? ([Show credential](#))
