EXPERIENCE

Frontend Developer — Feb 2023 - Present
30 Days Coding — *Hardoi (Uttar Pradesh)*

- Designed and developed web applications using HTML, CSS, JavaScript, and React.js to create interactive user interfaces.
- Used Tailwind CSS for responsive and visually appealing design across devices and managed source control with Git and GitHub.
- Optimized application performance and ensured cross-browser compatibility for a seamless user experience.

PROJECTS

ECHO VERSE Blog Application. [(Try it here)](#)

- Developed a full-stack blog application with secure user authentication, blog management, and responsive design.
- Used React and TailwindCSS for the frontend, with a Node.js/Express backend and MongoDB for data handling.
- Integrated features such as automated newsletters and image management via Cloudinary for improved functionality.

Hospital Management System. [(Try it here)](#) [(Try it here)](#)

- Developed a comprehensive hospital management system for ZeeCare Medical Institute, featuring secure patient management, appointment scheduling, and an admin dashboard for overseeing doctors and appointments.
- Built with React for the frontend, Node.js for the backend, and MongoDB for data storage, incorporating JWT-based authentication for secure access.
- Integrated Cloudinary for efficient image management and enhanced system functionality.

Jobly - A Job-Seeking App [(Try it here)](#)

- Built a job-seeking platform with secure authentication and real-time job search functionality using React and Clerk.
- Created responsive interfaces with TailwindCSS and integrated dynamic features like job application tracking and profile management.
- Used Supabase for real-time data handling and React Hook Form for efficient form validation.

AWARDS AND ACHIEVEMENTS

- Career Essentials in Generative AI by Microsoft and LinkedIn. [(Show credential)](#)
- What Is Generative AI? [(Show credential)](#)
